**Early Years Toolbox Privacy Statement**

The Early Years Toolbox (EYT) applications, and associated guidance on the www.eytoolbox.com.au website, is intended for use by professionals, educators and parents. All of our Apps were designed to assess young children's developing abilities, and to be administered under guided supervision of an adult.

Access to and use of the Early Years Toolbox apps and website are strictly at your own risk. The information generated by and contained within the apps and website were developed and validated for the purposes described on this website (i.e., assessing specific abilities, in appropriate assessment conditions, with typically developing pre-school aged children). We make no warranty, guarantee or promise concerning the content or accuracy of data generated by other users of the apps or website, and will not be liable for any injury or loss arising from their use or misuse.

Personal Information

The Early Years Toolbox apps do not require personal information in order to use them. The minimum information required is a Child ID, which can be any alpha-numeric string and need not be identifying. If desired, names and demographic information for children can be entered into our apps voluntarily, however at no time do we receive the information inputted into or derived from the apps. By default, these details will only display on the final screen at the end of each gameplay, and will remain on the local device being used at the time.

Settings within each of the apps can be configured to send children's results to a user-nominated email address or database URL. Where end-users have been asked to enter a specific URL or email address by an administering organisation or individual, the end-users should familiarise themselves with the privacy practices and policies of those organisations or individuals. We do not have access to or receive this information, and thus cannot ensure the security, privacy and anonymity of others' data storage practices.

For any research by the Early Years Toolbox team, we will provide details of our internal data storage and privacy practices when asked to participate.

Use of Crashlytics

The EYT applications are supported by Crashlytics, a crash reporting solution. Crashlytics monitors each of our apps and provides reports on issues that require fixes so that the Apps perform at their maximum performance and security levels. This allows us to identify and fix bugs in the apps proactively, and not have to wait for these to be reported by users. The Crashlytics privacy policy can be found at https://try.crashlytics.com/terms/privacy-policy.pdf

Contact

For any questions about the information above, or about the Early Years Toolbox more generally, you can contact the Early Years Toolbox team at eyt_dev@sockii.com
